

- **CARCINOGENIC:** Children, the elderly and those with compromised health are most at risk. In 2011 the World Health Organisation (WHO) classified microwave radiation from wireless devices as a Class 2B possible carcinogen (the same category as DDT, lead and chloroform).
- **NOT GREEN:** Trees, plants, animals, birds and bees are all damaged by radiation from smart meters and other sources of EMF/RF/Wi-Fi. Furthermore, smart meters are constantly on, using energy **ALL THE TIME**.
- **NO SAVINGS:** Increased bills, rather than promised savings, have been reported worldwide where smart meters are in use.
- **NO PRIVACY:** Data about your private usage collected from smart meters can be sold to marketing companies. Also, smart meters are vulnerable to hacking and interference.
- **NOT SAFE:** Smart meters have exploded and caused fires. They have also been shown to interfere with other sensitive electrical devices, such as heart pacemakers.

## What Can **You** Do?

- When you receive correspondence about your meter replacement or upgrade, contact the Utility company to **deny consent** for installation of any smart or wireless meter at your property.  
**Send Letter of Non-Consent** to Utility Companies. Download Letter and more information at [www.notosmart.wordpress.com](http://www.notosmart.wordpress.com)  
**Place a sign on your meter** box and property denying consent to install.
- **Write to your TDs and Councillors** telling them that you oppose the installation of smart meters.
- **Tell your neighbours**, friends and family about this. Inform your Resident's Association. Even if you do not have a smart meter on your property, the radiation from smart meters in your neighbourhood can adversely affect you and your family.
- **BE INFORMED** about the dangers of smart meters and other technology using EMF/RF/Wi-Fi by researching independent reports from scientists, doctors and researchers the world over. Read about those already affected, those who are campaigning and petitioning against smart meters and wireless radiation in other countries.

**SMART METERS ARE NOT MANDATORY**  
**SMART METERS ARE NOT SAFE.**  
**YOU HAVE A LAWFUL RIGHT TO REFUSE THEM.**

**STOP SMART METERS IN IRELAND**

**STOP**  
**SMART**  
**METERS**  
**IN IRELAND**

**In September 2017, The Commission for Regulation of Utilities announced plans to install Smart Meters in every home in the country. Existing Gas and Electric analogue meters are being replaced with smart meters which operate using pulsed wireless microwave technology. The utility companies and the Irish Government may not warn you about these meters and their dangers to you and your family.**

## What's **Wrong** with smart meters?

- **NOT HEALTHY:** All smart meters emit pulsed microwave radiation that is detrimental to health. They can emit up to 190,000 intense pulses of microwave radiation 24/7. A smart meter is a device that transmits your usage data via microwave radiation.
- **HARMFUL:** Thousands of published scientific studies have shown serious harmful effects to people, animals and plants from this wireless radiation. Effects such as headaches, sleep disorders, fatigue, irritability, nausea, dizziness, nosebleeds, memory loss, concentration impairment and "microwave hearing" (ie the hum) have all been widely reported wherever smart meters are installed.
- **ILLNESS:** Long term exposure to this microwave radiation can result in serious illnesses such as cancers, depression, Alzheimer's, ME, auto immune diseases and more. Many people in Ireland and worldwide are already suffering ill health from exposure to wireless radiation from wifi, masts, mobile and cordless phones, baby monitors and other wireless devices. The combined effect of these and radiation from Smart Meters will lead to more people getting sick. *Continued overleaf ...*
